

BIOKLEEN ALL®

A tangible benefit would be the ability to eliminate multiple cleaning solutions onsite, which greatly simplifies the cleaning program as well as the required distribution chain.

Environmentally neutral and extremely concentrated and does not lose its effectiveness through dilution, making it very economical

THE PRODUCT

1

Concentrated Formula

Promote the safety and sustainability factor of their cleaning materials

2

Safe

Consolidate all the various cleaning products into one environmentally friendly solution, that is non-toxic, hypo-allergenic and releases NO harmful Volatile Organic Compounds (VOCs).

3

Ethics

Improve employee morale by reassuring them the products being used are safe for them, the environment and their customers

4

Long Lasting Effect up to 8 Hours

Provide a better Multipurpose and safer clean

- Glass
- Floor
- Carpet
- Wood
- Walls

THE SPRAYER

1

Accurate Dilution Rate

Saves time and labour costs as it eliminates the need for messy and inaccurate dilution process.

2

Durable materials

Outlasts conventional trigger sprayer by 500 to 1.

3

Sustainable

99% reduction in plastic disposal per device.

4

Operation

The Sprayer dispenses two liquids simultaneously. Its dilution control dial allows the user to adjust the dilution of the two liquids, making it suitable for a concentrated liquid with various applications dependent upon its dilution rate to water.

THE PRODUCT BIOKLEEN ALL®

THE SPRAYER BIOKLEEN ALL®

THE INNOVATION

Our Innovation is a new process for the efficient utilization of BIOKLEEN ALL 'All Purpose Cleaner'. Prior to this innovation a spray bottle of solution needed to be mixed daily, as the active life once mixed was only 8 hours. Bee-Clean researched and sourced an innovative two chambered spray bottle that only mixes chemical as it is sprayed, at controlled dilution rates, greatly reducing waste and improving range of use.

THE SOLUTION

The product can be used as a single source cleaning solution for most facilities eliminating the need for windex, cream cleanser, stainless steel cleaner and neutral cleaner. This when coupled with the high dilution rates and minimized distribution costs reduces our overall cleaning chemical costs by 20% on average. Employee training time is also reduced as the chemical is exempt from the WHIMIS/GDS regulations due to its natural sources.

The innovation allows us to utilize this solution throughout an entire building which ensures the whole cleaning program is completely environmentally friendly. It also allows us to utilize a highly concentrated product and distribute it in single 5 gallon pails with very infrequent intervals to our locations, which greatly reduces the distribution footprint. A typical bank branch may only need one delivery a year.

THE SPECIFICATION

BIOKLEEN ALL is a unique blend of beneficial bacteria and enzymes, natural solvents and surfactants designed to cut through and eliminate difficult-to-clean dirt, grime, organic stains and grease quickly and safely on virtually any surface.

Since the solution is 100% biodegradable and PH neutral, it is gentle on your hands and won't damage surfaces, equipment, plumbing, drainage or septic systems. This natural, all-surface cleaner is especially kind to the environment. It is preservative-free, contains no synthetic dyes or fragrances and is free from harmful ammonia, chlorine and toxic phosphates present in many other surface cleaners. It is recommended for use in all cleaning environments including ones that are prone to hypersensitivity.

This all surface cleaning product is used by professionals to:

- 1- Promote the safety and sustainability factor of their cleaning materials.
- 2- Consolidate all the various cleaning products into one environmentally friendly solution, that is non-toxic, hypo-allergenic and releases NO harmful Volatile Organic Compounds (VOCs).
- 3- Improve employee morale by reassuring them the products being used are safe for them, the environment and their customers.
- 4- Provide a better and safer clean.
